PROFESSIONAL SUMMARY

Delivery leader with 12 years in software, spanning engineering, Agile team leadership and project management. Led technical delivery of the TrueID Payment & Subscription system with Product Owners, translating business needs into designs, and sustained 99.99% uptime on revenue-critical services. MSc IT Management (NIDA).

WORK EXPERIENCE

Project Manager 2026 – Present
Always Pioneering Innovation (client: Saha Pathanapibul)

- Established end-to-end ERP project frameworks for Saha Pathanapibul, from planning through deployment.
- Directed integration of internal applications with NetSuite ERP, validating 40+ API endpoints for data synchronization.
- Aligned internal teams, business users and NetSuite vendors with business needs; managed risks and resolved critical blockers to protect timelines.
- Led the Business Analyst team in adopting AI-driven tools to streamline workflows, enhance productivity and accelerate delivery.
- Deliver executive updates on project milestones and alignment; mentor Project Managers and development teams across concurrent projects.

Project Manager 2024 – 2026
Toyota Connected Asia Pacific

- Delivered 10+ projects within scope, budget and time constraints, directing full-lifecycle development of the T Connected application.
- Led 2 Business Analysts, 2 System Analysts and 2 external vendor developer teams.
- Acted as central liaison for stakeholders, led decision-making forums and mitigated project risks to minimize delivery impact.
- Maintained timelines, dependency maps and progress dashboards; coordinated releases, including readiness checks, deployment planning and post-delivery validation.

Software Engineering Team Lead 2018 – 2024
True Digital

- Led technical delivery of the TrueID Payment & Subscription system, working with Product Owners to translate business needs into architectural designs.
- Facilitated Scrum ceremonies and refined backlogs to maintain delivery visibility and steady progress.
- Integrated CI/CD pipelines with automated testing before production to catch bugs early and reduce post-release errors.
- Built monitoring dashboards and served as Tier-3 escalation point, maintaining 99.99% uptime for revenue-generating services.
- Directed and mentored a cross-functional team of 5 (4 Developers, 1 QA).

Senior Frontend Developer 2017 – 2018
True Digital

- Built responsive interfaces and integrated backend microservices for the True iService application; enforced GitFlow and CI/CD build validation.
- Partnered with Product Owners in Agile teams to refine user stories and prioritize technical scope.

Earlier Roles

Product Developer, RAPID 4 CLOUD (2015 – 2017); Campaign Developer, Digital Alchemy (2014 – 2015)

- Built a Selenium WebDriver framework validating data between Oracle Fusion Applications and backend databases, reducing manual testing effort.
- Translated client objectives into IBM Unica campaign workflows; validated data logic and QA with data-privacy compliance.
