SQL · Database design · UML · RESTful API

DELIVERY TOOLS

Jira · Confluence · Gantt chart · GitFlow · Excel · PowerPoint · Word

AI CODING AGENTS

Claude Code · Antigravity (Gemini) · ChatGPT Codex

PRACTICES

Agile / Scrum · Monitoring dashboards · Microservices

CERTIFICATIONS

CompTIA Project+
IT Project Management · 2025

ITIL Foundation Certificate
IT Service Management · 2025

PROFILE

IT Project Manager with 12 years in software, from developer to team lead to project manager, so I speak both business and engineering. I lead ERP and enterprise delivery across users and vendors, and build my own tools with AI coding agents.

WORK EXPERIENCE

Project Manager — 2026 – Present

Always Pioneering Innovation · client Saha Pathanapibul

- Established end-to-end ERP project frameworks for Saha Pathanapibul, from planning to deployment.
- Directed integration of internal applications with NetSuite ERP, validating 40+ API endpoints for data synchronization.
- Aligned internal teams, business users and NetSuite vendors; managed risks and cleared critical blockers to protect timelines.
- Built a UAT Tracker with AI coding agents for the SPC New ERP (NetSuite): daily test plans, scenario details, result recording and a user guide, in use by the client's users.
- Led the Business Analyst team in adopting AI-driven tools; mentored Project Managers and developers; delivered executive updates on milestones.

Project Manager — 2024 – 2026

Toyota Connected Asia Pacific

- Delivered 10+ projects within scope, budget and time constraints, directing full-lifecycle development of the T Connected application.
- Led 2 Business Analysts, 2 System Analysts and 2 external vendor developer teams.
- Acted as central liaison for stakeholders, led decision-making forums and mitigated project risks to minimize delivery impact.
- Maintained timelines, dependency maps and progress dashboards; coordinated releases, including readiness checks, deployment planning and post-delivery validation.

Software Engineering Team Lead — 2018 – 2024

True Digital

- Led technical delivery of the TrueID Payment & Subscription system, working with Product Owners to translate business needs into architectural designs.
- Facilitated Scrum ceremonies and refined backlogs to maintain delivery visibility and steady progress.
- Integrated CI/CD pipelines with automated testing before production to catch bugs early and reduce post-release errors.
- Built monitoring dashboards and served as the Tier-3 escalation point for revenue-generating services.
- Directed and mentored a cross-functional team of 5 (4 developers, 1 QA).

Senior Frontend Developer — 2017 – 2018

True Digital

- Built responsive interfaces and integrated backend microservices for the True iService application; enforced GitFlow and CI/CD build validation.
- Partnered with Product Owners in Agile teams to refine user stories and prioritize technical scope.

EDUCATION

MSc, Information Technology Management
NIDA, Bangkok · 2025

BSc, Information Technology
The Far Eastern University, Chiang Mai · 2014

LANGUAGES

Thai · native

English · working proficiency (TOEIC 695)

Product Developer, RAPID 4 CLOUD 2015 – 2017

Campaign Developer, Digital Alchemy 2014 – 2015

- Product Developer: Built a Selenium WebDriver framework validating data between Oracle Fusion Applications and backend databases, reducing manual testing effort.
- Campaign Developer: Translated client objectives into IBM Unica campaign workflows; validated data logic and QA with data-privacy compliance.

BUILT WITH AI

UAT Tracker for SPC New ERP IN USE
UAT system for Saha Pathanapibul users on NetSuite: daily test plan, scenario details, result recording page and user guide.

Horoscope IN USE
Astrology web app: daily and monthly horoscope, tarot card draws and lottery lucky numbers.

TeamFlow IN DEVELOPMENT
Project management system for organising team tasks, in the spirit of Jira and ClickUp.

Built with AI coding agents: Claude Code, Antigravity (Gemini) and ChatGPT Codex.
